

Q. 1. Write briefly on any four [20]

1. <sup>1<sup>a</sup></sup> Heart
2. <sup>2<sup>a</sup></sup> Stomach
3. <sup>2<sup>a</sup></sup> kidney
4. spleen
5. <sup>8<sup>b</sup></sup> Bony pelvis.

Q. 2. Write a short notes on any three of the Following. [18]

- 1 <sup>8<sup>a</sup></sup> Name of the bones in the upper limb & give their respective positions.
- 2 <sup>2<sup>a</sup></sup> Draw the spinal cord. What are the functions.
- 3 <sup>3<sup>b</sup></sup> Describe the spinal cord. What are the functions.
4. <sup>3<sup>c</sup></sup> Name the parts of female reproductive System & describe the uterus.

Q. 3. Describe the method of injecting the human Cadaver (201 1<sup>a</sup>HES), Name the chemical used with their functions. [12]

Paper - II

Anatomy

Q. 1 Describe the bones of lower limb. [15]

OR

Describe Embalming

Q. 2 Write short note on. [20]

a. Name the parts of urinary system & describe kidney in detail.

b. Museum technique

c. Describe lung

Q. 3 Write short note. [15]

a. Draw & label the parts of Female Reproductive system

b. Classification of Bones

c. Describe Stomach

d. Steaming technique

2004

Anatomy

Q. 1 Describe the bones of upper limb. [15]

OR

Anatomy museum.

Q. 2 Write short notes on. (two out of three) [20]

a. Name the parts of Genital system & describe the uterus in detail.

b. Describe the methods of Embalming.

c. Describe liver.

Q. 3 Write short notes on [three out of four.] [15]

a. Histological techniques

b. Heart

c. Draw & label the parts of urinary system.

d. joints of lower limb.

20<sup>th</sup>  
2007-08

D. J. Medical College

Anatomy

Q. 1 <sup>a&b</sup> Describe the bones of upper limb. [15]  
OR

Enumerate the methods for preservation of dead body  
& write in detail about embalming.

Q. 2. short Notes. (Two out of three) [20]

- Name the parts of gastrointestinal system and describe the stomach in detail.
- <sup>3<sup>rd</sup></sup> Describe uterus.
- <sup>2<sup>nd</sup></sup> Describe joints of lower limb.

Q. 3 short notes. (three) [15]

- <sup>2<sup>nd</sup></sup> Draw & label the part of urinary system.
- <sup>1<sup>st</sup></sup> Describe heart.
- ~~x~~ Describe museum techniques.
- Discuss various steps for preparation of histology slides.

2007

Anatomy

1. Write short notes on any three. [15]

a. <sup>1<sup>st</sup></sup> Heart

b. <sup>2<sup>nd</sup></sup> Stomach

c. <sup>3<sup>rd</sup></sup> Uterus.

d. <sup>4<sup>th</sup></sup> Testes.

2. Write short notes on any two. [20]

a. Methodes of pre servation of Human body after death.

b. Parts of Nervous system.

c. Name bones of lower limbs & give their articulations.

3. Write short Notes on any two [15]

a. <sup>1<sup>st</sup></sup> Draw label parts of urinary system.

b. Haematoxylin - Eosin.

c. Care of microscopes.

d. Collection & fixation of tissues.

Q. 1 Describe the Embalming of cadaver, what preparation you will take. [25]

Q. 2 Write briefly on any three [15]

- Draw & label parts of urinary system. Describe kidney.
- Bones & joints of upper limb
- Name parts of male genital system.
- Care of museum specimen.

Q. 3. Write notes on any Four. [20]

- Name different types of microscopes & Name parts of Compound light microscope.
- praggin embedding of tissues.
- Maceration
- Xylene, Eosin
- Articulation of Human skeleton

st.

21 2008-2009

D.J.T. Medical College

Anatomy

1. Describe the bones of lower limb in detail and  
2<sup>nd</sup> mention the joints formed by them. [15]

OR

Describe museum techniques.

- Q.2 Write short notes on (any two) [20]

a. Embalming.

b. <sup>29</sup> Describe kidney.

c. Name the bones of upper limb and describe humerus in detail.

- Q.3. Write short notes on (any three) [15]

a. <sup>25</sup> Draw and label the parts of respiratory system.

b. <sup>34</sup> Spinal cord.

c. <sup>24</sup> Liver

d. Histological techniques.

2010 - 2011

Anatomy

Q. 1. Describe the bones of upper limbs. [15]

OR

Q. 1. Enumerate the methods of preservation of dead body and write in detail about Embalming.

Q. 2. Write short notes on (two out of three.) [20]

1. ~~Heart~~ Heart

2. ~~Stomach~~ Stomach

3. Histological techniques.

Q. 3. Write short notes on. (three out of four.) [15]

a. ~~Draw~~ Draw and label various parts of urinary system.

b. Describe museum techniques.

c. ~~uterus~~ Uterus.

d. ~~Describe~~ Describe the joints of lower limb.

Paper - III

Anatomy

Q. 1. Describe bones of upper limb. [15]

OR

Anatomy museum.

Q. 2. Write short notes.

1. <sup>5</sup> Frame the parts of Genital system & describe uterus in detail.

2. <sup>5</sup> Describe liver.

3. Describe method of Embalming.

Q. 3 Write short notes on.

1. Histological technique.

2. <sup>10</sup> Heart

3. <sup>10</sup> Draw & label the parts of urinary system.

4. <sup>10</sup> Joints of lower limb.

Paper - III

Q. 1. Describe the procedure of injecting dead body.

Q. 2 Write Briefly any three.

1. <sup>10</sup> Heart

2. <sup>10</sup> Stomach

3. Rixction

4. Rixatives.

25 - 2011

Engg 1009

Q. 1 Enumerate the functions of following. [20]

① <sup>123</sup> kidney

③ <sup>223</sup> Testis.

② <sup>120</sup> pancreas.

④ Stomach.

Q. 2 Match the following. [10]

1 Insulin

3 Anterior pituitary.

2 Adrenaline

7 Thyroid

3 Growth Hormone

5 Ovary

4 Thyroxin

1 Pancreas

5 Progesterone

2 Adrenal medulla.

Q. 3 Ans. any five of the following. [15]

1 <sup>127</sup> Movements of small intestine

2 Name six coagulation factors. ✗ ✗ ✗

3 <sup>63</sup> Classification of WBC

4 <sup>41600</sup> Classification of Nerve fibers. ✗ ✗

5 <sup>10</sup> Name different Respiratory volumes and capacities. ✗

6 Factors affecting blood pressure

Q. 4 Normal values following [10]

1 Serum calcium - 8.5 to 11 mg/dl.

2 Different count -

3 Body Temperature - 36.5 to 37.5 °C, 96-98°F.

4 RBC count in female - 4.0 to 4.5 mill / cu mm of blood.  $3.8 \times 10^{12} / \text{mm}^3$

5 Anatomical & physiological Dead space volume  $150 \text{ ml}$

6 Glomerular filtration Rate - 125 ml/min or 180 liter/day

7 Radial pulse - 70-72 lack/min. 60-80 pulse beat/minite.  $75-80 \text{ bpm}$

8 Platelet count - 1.5 to 5.0 lack / cu mm (ul)  $150 \times 10^9 \text{ to } 10^11 / \text{mm}^3$

9 Bleeding time & clotting time BT = 1 to 3 min.  $2.5 \text{ to } 3 \text{ min}$

10 Cardiac out put CT = 4. to 6 min  $2.2 \text{ L/min}$  5-6 L/min

25 - 2011

English

Q. 1 Enumerate the functions of following. [20]

① kidney

③ Testis

② pancreas

④ Stomach

Q. 2 Match the following.

1 Insulin

3 Anterior pituitary

2 Adrenaline

7 Thyroid

3 Growth Hormone

5 Ovary

4 Thyroxin

1 Pancreas

5 Progesterone

2 Adrenal medulla

Q. 3 Ans. any five of the following. [15]

1 Movements of small intestine

2 Name six coagulation factors. ✗ ✗ ✗

3 Classification of WBC

4 Classification of Nerve fibers. ✗ ✗

5 Name different Respiratory volumes and capacities. ✗

6 Factors affecting blood pressure

Q. 4 Normal values following [10]

1 Serum calcium - 8.5 to 11 mg/dl.

2 Different count -

3 Body Temperature - 36.5 to 37.5 °C, 96-98°F

4 RBC count in female - 4.0 to 4.5 mill / cu mm of blood.  $3.8 \times 10^{12} / \text{mm}^3$

5 Anatomical & physiological Dead space volume  $150 \text{ ml}$

6 Glomerular filtration Rate - 125 ml/min or 180 liter/day

7 Radial pulse - 70-72 lack/min. 60-80 pulse beat/minite.  $75-80 \text{ bpm}$

8 Platelet count - 1.5 to 5.0 lack / cu mm (ul)  $150 \times 10^9 \text{ to } 10^10 / \text{mm}^3$

9 Bleeding time & clotting time BT = 1 to 3 min.  $2.5 \text{ to } 3 \text{ min}$

10 Cardiac out put CT = 4. to 6 min  $3.2 \text{ L/min}$   $5-6 \text{ L/min}$

Q. 3 Fill in the blanks [10]

- 1 Functional & structural unit of Nervous system is **Neuron**
- 2 Pace maker of heart is **S.A. Node**
- 3 Normal blood sugar level, fasting & post prandial is **Tyrosin** & **Chymotrypsin** RBS -  $< 200 \text{ mg/dl}$
- 4 Protein digesting enzymes present in pancreatic juice are **Tyrosin** & **Chymotrypsin**
- 5 Dietary mineral **Iodine** is essential for synthesis of thyroid hormones.
- 6 Respiratory centers are present in **Brianstem** & **Cerebral cortex**
- 7 Muscle proteins are **Myosin** & **Pectin**
- 8 During adult life red blood cell formation occurs in **Bone marrow**
- 9 Emptying of urinary bladder is a function of **Micturition reflex**.
- 10 Ascending tracts of spinal cord carry **Fine touch** & **Vibration** sensations.

22<sup>nd</sup> - 2010 Physiology

Q. 1 (A) Ans. any five of the following. [15]

1) List the instruments & chemical solutions required for the experiment of "Amphibian nerve & muscle practical." xxx ✓

2) Enumerate the tests for hearing.

3) Write the composition of Turk's fluid. xxx ✓

4) Draw the diagram of nephron. O

5) Enumerate the different methods of Artificial Respiration. xxx

6) How will you take care of microscope? xxx

7) List the instruments and chemical solutions required for the experiment of measurement of B.P in dog. xxx

B) Match the Following [5]

1. Spinal cord - 3 Image formation.

2. Pancrease - 4 Testosterone

3. Retina - 1 reflex

Cerebellum - 5 Insulin

4. Male sex hormone - 2 Equilibrium.

Q. 2 (A) Write short notes on any three. [15]

1) Nearcone

5) Puberty.

2) Functions of lungs

3) Cardiac cycle

4) ESR

B) True or False. (5)

Cardiac muscle is an examples of voluntary muscle. X

In hemophilia, clotting time is increased X ✓

Cross matching is must even if blood groups of donor and recipient are compatible. ✓

We can survive even if one kidney is removed. ✓

Goiter is caused by less secretion of thyroid hormone. X

Fill in the blanks: (10)

Normal respiratory rate is 10-16/min OR 14-18/min

Receptors in eye are

Erythropoiesis occurs in Bone marrow.

Smooth muscle are present in visceral.

Blood pressure is recorded by instrument sphygmomanometer.

Bile is stored in Gall Bladder.

Receptor for Hearing is cortex.

Normal tidal volume is 500 ml.

posterior pituitary glands secretes vasopressin & oxytoxin hormone

process of formation of sperm is known as

51  
21 - 2009

## Physiology

1. [A] Ans. any Five [15]

59 Enumerate the anticoagulants & their use in the laboratory. xxx

60 Write the procedure to make Leishman soln at your laboratory. xxm

61 List of instrument & chemical required for experiment on frog's heart.

62 How would you determine the blood group of the subject.

63 What precautions you will take while with drawing a sample of venous blood. xxx

64 Draw & label the different waves in normal ECG.

65 Name the different parts of compound microscope. xx

[B] Match the Following. [5]

1. Parathyroid gland - 4 1. Female sex hormone

2. Receptors for hearing. - 5 2. Loop of Henle

3. Ovary - 1 3. Increased heart rate

Tachycardia - 3 4. Tetany

5. conc. of urine - 2 5. Organ of corti

7. (A) short notes. [15]

1. Functions of Respiratory system.

2. Basic mechanism of blood coagulation.

3. Functions of liver.

4. Functions of Brain.

5. Structure & Function of Heart.

8. True OR False [5]

C2 RBC count increases in anaemia. X

Progesterone is male sex hormone. X

Loss of pain sensation is known as anaesthesia. ✓

Structural & functional unit of kidney is nephron. X

X pacemaker of heart is SA node. ✓

13 Fill in blanks. [10]

1) Normal heart rate is 72 beats

2) Normal WBC count is 5000 - 11000 cells/cu

Normal blood sugar is 70 - 110 mg/dl

Visual receptors are rods and cones.

3) Hormones of posterior pituitary gland are vasopressin & oxytoxin

• protein is digested by pepsin enzymes in gastric juice

Muscle proteins are

4) Normal cardiac output per min is 5 liter

Respiratory centre are

Ascending tracts of spinal cord are sensory & Afferent
